PROFILE

Bachelor of Computer Science graduate with practical experience across software development, system configuration, and technical support. Strong problem-solving abilities with experience translating business needs into effective technical solutions. Adaptable, quick to learn new technologies, and confident working both independently and in team environments. Open to opportunities across all areas of IT and committed to continuous professional growth.

EDUCATION

Bachelor of Computer Science August 2022 - June 2025
Charles Darwin University

WORK HISTORY

Freelance Web Developer March 2025 – Present
William Sims Books

- Design and configure a business website using Odoo, creating structured pages to showcase published books and author information
- Configure Odoo modules for content management and newsletters, supporting communication with readers and subscribers.
- Maintain and update structured content, ensuring accuracy and consistency across the website.
- Provide system configuration support and troubleshoot to resolve website and newsletter-related issues.
- Develop clear documentation and deliver one-on-one training to enable independent system and content management.

First Year Student Success Partner January 2025 – March 2026
Charles Darwin University

- Contacted and supported over 1,000 commencing students each study period, conducting daily outbound calls to assist with enrolment, systems access, and study preparation.
- Guided a high volume of students through university systems and digital services, ensuring accurate capture and handling of confidential student information.
- Delivered clear, user-focused support to individuals with varying levels of technical proficiency, resolving enquiries efficiently and professionally.
- Provided tailored advice based on individual circumstances while maintaining strict confidentiality and compliance with university procedures.
- Escalated complex or sensitive matters to senior staff in accordance with established workflows.

Full-Stack Web Developer (Simulation Project) December 2024 – March 2025
CodeUp NT - True Blue IT Services

- Designed and developed a full-stack e-commerce platform using React.js, Node.js, and MongoDB as part of a simulated industry project.
- Implemented separate user and admin interfaces supporting product management, order tracking, and account management.
- Built backend APIs and managed database collections for products, users, and orders to ensure structured data relationships.
- Integrated cloud-based image storage using Cloudinary for efficient product media management.
- Collaborated within a phased development lifecycle covering frontend, backend, and database implementation.
- Identified and resolved system issues to improve application performance and reliability.
- Deployed the completed application using Vercel for cloud hosting.

Software Developer (Placement) December 2024
Charles Darwin University

- Digitalised a manual business form using Microsoft Power Apps and SharePoint Lists, translating paper-based workflows into a structured, automated digital solution.
- Engaged with university stakeholders to gather and clarify business requirements, document approval workflows, and ensure alignment with operational needs.
- Designed and refined data models, improving entity relationships by implementing unique object ID linkages to enhance data accuracy and maintainability.
- Implemented validation logic and business rules within the application to ensure data integrity and compliance with process requirements.
- Conducted structured testing, resolved validation and configuration issues, and documented changes to maintain transparency and quality standards.

Retail Sales Assistant August 2024 – Present
Shaver Shop, Australia

- Maintained accurate records and performed routine administrative checks to ensure data integrity and compliance with organisational procedures.
- Coordinated with different departments to resolve stock discrepancies, support inventory transfers, and ensure timely availability of resources.

SKILLS

Technical Skills

- **Programming & Frameworks**: ASP.NET, SQL, Python, Java, React.js, Django, C#, HTML/CSS
- **Database Management:** SQL Server, MongoDB, SharePoint Lists, ERD design, CRUD operations.
- **Data Visualisation:** Tableau, Microsoft PowerBI
- **Tools & Platforms:** Microsoft Power Automate, Power Query, Visual Studio 2022, GitHub, Jupyter Notebook, Cisco Packet Tracer.

PROJECTS

Sales & Customer Dashboards
https://shorturl.at/UouAV

- Developed interactive Tableau dashboards using calculated fields, parameters, and filters to analyse sales and customer data across multiple dimensions.
- Performed year-over-year, monthly, and weekly trend analysis to evaluate sales, profit, quantity, and customer KPIs.
- Built KPI metrics including total sales, profit, order volume, customer counts, and sales per customer with comparative current and prior year logic
- Designed drill-down and cross-filtering functionality by product category, subcategory, and geographic attributes to support exploratory analysis and reporting.

Automating Table Extraction from Academic Papers Using Python – Charles Darwin University
https://github.com/abedcodes13/AutomatingTableExtraction

- Developed Python programs to extract groundwater data tables from academic papers where results are not stored in centralised databases.
- Tested multiple extraction approaches on 29 papers containing 85 tables, comparing performance across different table layouts and PDF formats.
- Used Camelot, PDF processing, and data-cleaning techniques to convert unstructured tables into structured datasets for analysis and potential integration into digital data systems.

AWARDS

Academic Excellence Award – C Programming October 2025
Charles Darwin University

Academic Excellence Award – Research Project May 2025
Charles Darwin University

VOLUNTEERING/STUDENT CLUBS

Co-founder/President August 2024 – June 2025
Vice - President July 2024 – August 2024
Secretary August 2023 - July 2024
Mini Soccer and Cricket – Charles Darwin University

- Led a student sports club organising weekly sports events attended by 30+ students, fostering teamwork and social engagement.
- Coordinated two major tournaments with 90+ participants, communicating with student group leaders and sponsors to ensure smooth event delivery.
- Supported new team members in managing social media, handling club funds, and conducting risk assessments to maintain organised operations.
